The Wyoming Water Development Commission

2013 Public Water System Survey Report

During 2013, the Wyoming Water Development Commission (WWDC) conducted a survey of all known municipal and non-municipal community public water systems in the State of Wyoming. The response to this survey was excellent: Out of a potential of 204 surveys, 143 were returned. The WWDC is grateful for the cooperation of the entities that submitted information.

The results of this survey have been summarized in the following reports. All information contained in these reports was submitted by municipalities, special districts, utility companies, or homeowners associations. Data were checked or verified only if a conflict or obvious discrepancy was noted during the data entry process. Some entities responded with incomplete information, and others indicated that systems were closed, incorporated into another entity or so small that the questions on the survey did not apply. Therefore, some data may not appear for certain entities. Water rates, testing costs, and other information may have changed since the survey was completed. If more specific or more current data are necessary, users should contact individual systems.

The WWDC hopes these reports are of benefit to Wyoming communities, agencies and water users. If the information in these reports is inaccurate for your community, please send corrections to the WWDC as the database will be updated on a regular basis.

The 2013 Water System Survey Report consists of six separate reports, each of which is explained in detail within the following *Key to Water System Survey Reports*. This key identifies and defines the individual fields in the reports. Codes used in various fields are explained at the beginning of each report.

If you have any questions, comments or suggestions on this survey or future surveys, please contact Jon Wade of the Wyoming Water Development Commission; 6920 Yellowtail Rd.; Cheyenne, WY 82002 or call 307-777-7626.

KEY TO WATER SYSTEM SURVEY REPORTS

Report #1: Mailing List

This Report contains the status, EPA's public water systems identification number, contact person, mailing address, and phone number for each entity. Entities that did not respond to the 2013 survey may have incorrect contact information.

Report #2: System Data

System data refers to the source of the entity's water supply, storage, treatment, and volumes of water. The individual fields are defined as follows:

Number of Wells:	The number of wells used by an entity.
Number of Springs:	The number of springs used by an entity.
Surface Water Source:	The surface source of an entity's water supply.
Type of Diversion:	How the surface source is diverted. N/A is used for entities with no source of surface water.
Other Water Sources:	The name of other water systems or municipalities that provide the entity with water supply.
Total System Capacity:	The total production capabilities of all water sources in the particular entity, expressed in gallons per day (gpd).
Total Raw/Treated Water Storage:	The maximum values of water storage capacity, raw/treated, in gallons.
Treatment Methods:	Methods the water system currently uses on a regular basis to treat the water supply.

Report #3: System Use:

This report contains information pertaining to water system usage, providing information on the total population served, amount of average use, and other factors that may affect water consumption levels. The individual fields are defined as follows:

Total Population Served:	Number of people in entity receiving water services
Number of Taps In/Outside entity:	The number of service connections within the boundaries of the entity. The number of service connections outside the entity boundaries.
Total annual water use by the system:	The total gallons of water used by the water system annually (gallons).
Peak day water use for the system:	The maximum gallons of water used by the system in a 24 hour period in gallons.
Whom do you sell water to:	For those entities that sell water, who do you sell to?
What is the estimated loss to leakage (gpd):	The percentage of total water used by the system lost through leakage in gallons per day. Most answers are approximations.

Report #4: Billing Rates

The Billing Rates Report consists of billing information for each entity. The individual fields are defined as follows:

Does the entity bill by meter:	Does the entity bill by meter
What is the average monthly water bill:	The entity's estimate of the average residential water bill.
Residential Tap Fees:	The dollar amount a person pays to connect his or her home to an entity's water supply.
Residential Base Water Rate:	The dollar amount the entity charges as a base rate. Additional water use above the base rate may increase the total water bill.
Residential Gallons Included:	The gallon amount the household can use for the base rate. Many entities allow a certain gallon amount to be used before they charge extra. Others charge a base rate for service and charge an additional amount for all gallons used.
Rate for each 1,000 gallons above the base amount:	The dollar amount per thousand gallons a homeowner must pay after using the specified monthly amount.

Report #5: Fiscal Data

This report consists of the entity's budget and includes the primary breakdown of the annual budget. Details of funding capabilities and liabilities are also covered in this report. The individual fields are defined below:

Annual Budget:	The total annual operating budget.
Maintenance:	The annual dollar amount allocated to maintain and repair damage to the water system.
Water Quality:	The dollar amount of the annual budget that is allocated to meet water quality testing requirements.
Sinking Fund:	The dollar amount of the annual budget that is allocated to a sinking fund. If the value is zero the entity does not regularly contribute to a sinking fund.
System Self Supporting:	Yes or No, if the revenues generated by billing fully cover the system operating costs.
Other Funding:	Other organizations or areas of funding that are utilized by the entity to support system construction, repairs or maintenance.

Report #6: Wellhead Protection and Conservation Measures

The Wellhead Protection and Conservation Measures Reports are designed to give additional information on wells located in an entity and the conservation practices in place. The individual fields are defined below:

# of Wells:	The number of wells used by an entity.
Well Depth:	The minimum and maximum value of the depth of all wells located in an entity, given in two separate fields.
Wellhead Protection:	Yes or No, if the entity presently has a wellhead or source water protection plan in place.
Contact Person:	The person in charge of the entities wellhead protection program.
Conservation:	Programs supported by the entity to reduce water consumption and increase public awareness about water conservation.
Cons. Effective:	Yes or No, if the entity has noticed a decrease in water use due to conservation practices.
% Reduction:	Estimated percentage decrease in water use due to conservation practices.

*Entities in red font did not respond to the current survey, most recent data given

Wyoming Public Water System Survey General Statistics:

A total of 215 Public Water Systems are listed in the WRDS database. Of this total, eleven (11) entities were either dissolved, duplications or too small to be a public water system. The percentage of surveys returned to the WWDC increased from 52% (2011) to 69% (2013). Survey response methods varied: Approximately ninety-three (45%) were returned by mail, seventy-four (36%) were returned online, seventeen (8%) by email, eleven (5%) by phone, six (3%) by FAX, eight (4%) were a combination of methods aforementioned, and six (3%) had no current contact information. There are 44 entities in the database who have not responded since 2009.

The tables below provide basic information for public water use across the state. The survey data were reviewed and tabulated, with unexplained outliers removed to provide averages and totals for water use, rates and general fiscal information.

	Total	Average
Total population served	524,437	2,835
Number of taps in entity	163,713	900
Number of taps outside entity	22,968	131
Number of Wells	565	3
Number of Springs	48	
Total system capacity in gallons per day	407,015,764	2,768,815
Total raw water storage (gal)	24,327,581,138	166,627,268
Total treated water storage (gal)	287,772,229	1,712,930
Total annual water use by the system (gal)	56,770,530,648	344,063,822
Peak day water use for the system (gal)	240,265,332	1,692,009
What % of the system is metered		78
Residential Tap Fees		\$1,295
Residential Base Water Rate		\$26
Residential Gallons Included in the Base Water Rate		8,835
Commercial Tap Fees		\$1,426
Commercial Base Water Rate		\$32
Commercial, Gallons Included in the Base Water Rate		8,878
Average monthly water bill		\$42
Rate for each 1,000 gallons above the base amount		\$2.15
Household bill for using 10,000 gallons in a month		\$42
Household bill for using 20,000 gallons in a month		\$61
Annual budget for the system	\$251,196,712	\$1,452,004
Operation and maintenance annually	\$74,301,617	\$444,920
Water quality testing cost annually	\$1,147,868	\$6,674
Emergency/replacement fund	\$75,798,223	\$557,340
Annual sinking fund contribution	\$7,471,160	\$61,239
Revenues from water bills	\$103,401,520	\$733,344

	Yes	No
Do you sell bulk water	72	109
Do you sell water to other entities	28	134
Does the entity bill by meter	138	43
Is the water system self-supporting	146	30
Is there a wellhead protection plan in place	97	43
